

Honey: lab analysis and product recall report

1. User:
 - this template is not relevant to small scale operators who pack only enough honey for household consumption
2. Frequency of use:
 - infrequent
3. Reasons for recording this information include:
 - business management
 - this record is part of CFIA registration requirements
 - predicting short and long term effect of recall (including lost cost of honey, containers, manpower, and transportation)
 - records details on customer service after recall to maintain good relationship/ future sales
 - food safety
 - helps ensure correct protocol followed
 - provides a tool for tracing potential contaminants in honey
 - part of overall management to reduce potential contaminants in honey
4. References to the Bee Biosecurity Standard and CBISQT:
 - Bee Biosecurity Standard: none
 - CBISQT: pages 99-103
 - this template is an adaptation of CBISQT form 12.0.2 (page 153)
5. General comments:
 - keep associated records updated and relevant documentation handy and organized for easy reference
6. Export considerations:
 - beekeepers may be required to provide buyers with pollen analysis
